Counting-on and make-ten strategies

6 practice questions

1. Count on to find 12 + 2.

Start at twelve; count thirteen, fourteen.

Answer: 14

2. Find 2 + 9 by counting on from the larger number.

Start at nine; count ten, eleven.

Answer: 11

3. Make ten to find 7 + 5.

Split five into three and two: 7 + 3 + 2 = 12.

Answer: 12

4. Make ten to find 6 + 8.

Six needs four; split eight into four and four: 10 + 4 = 14.

Answer: 14

5. Ivy says 8 + 4 = 10 because eight needs two to make ten. What did she forget?

Four was split into two and two; both parts must be used.

Answer: She forgot the other two. The total is 12.

6. Find 9 + 6. Show the split you use to make ten.

9 + 1 = 10; 10 + 5 = 15.

Answer: 15; split six into one and five.
