Simple class enterprise

6 practice questions

1. Materials for one bookmark cost one dollar. What do materials for two bookmarks cost?

One and one make two.

Answer: 2 dollars.

2. One bookmark sells for two dollars. What do two bookmarks sell for?

Two and two make four.

Answer: 4 dollars.

3. The class spends two dollars and receives five dollars. How much remains after covering the cost?

Five take away two leaves three.

Answer: 3 dollars.

4. The class has four dollars for materials. Can it make five bookmarks if materials cost one dollar each?

Five bookmarks need five dollars.

Answer: No. It needs one more dollar.

5. One group records a two-dollar sale. Another group records a two-dollar sale. Find the sales total.

Combine both sales: two and two make four.

Answer: 4 dollars.

6. The class has three dollars left after its shop. Suggest a sensible way to decide what to do with it.

A suitable answer includes a fair class decision and respects the three-dollar limit.

Answer: For example, discuss class needs and vote on an affordable choice, or agree to save it.
