Features of shapes and objects

6 practice questions

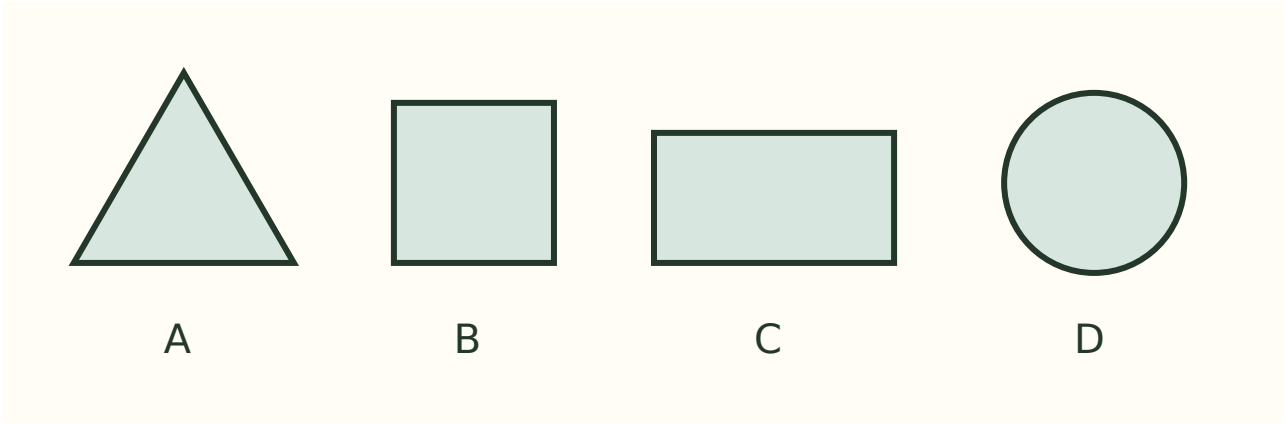

1. How many corners does pictured shape A have?

A is a triangle.

Answer: 3.

2. How many corners does pictured shape C have?

Trace around its four corners.

Answer: 4.

3. Does a ball have flat square faces?

A ball is curved all around.

Answer: No.

4. Name one solid object with flat faces.

Check that the object has a flat surface.

Answer: Answers vary, such as a cube-shaped block or box.

5. A solid has two flat round ends and one curved side. Name a familiar example.

Those are the features of a cylinder.

Answer: A can or cylinder.

6. Describe a square without using its colour or size.

Use the defining features, not appearance alone.

Answer: Four equal straight sides and four square corners.
