Shapes around us

6 practice questions

1. A plate's top outline is round with no corners. Which flat shape does it look like?

The outline is curved all around.

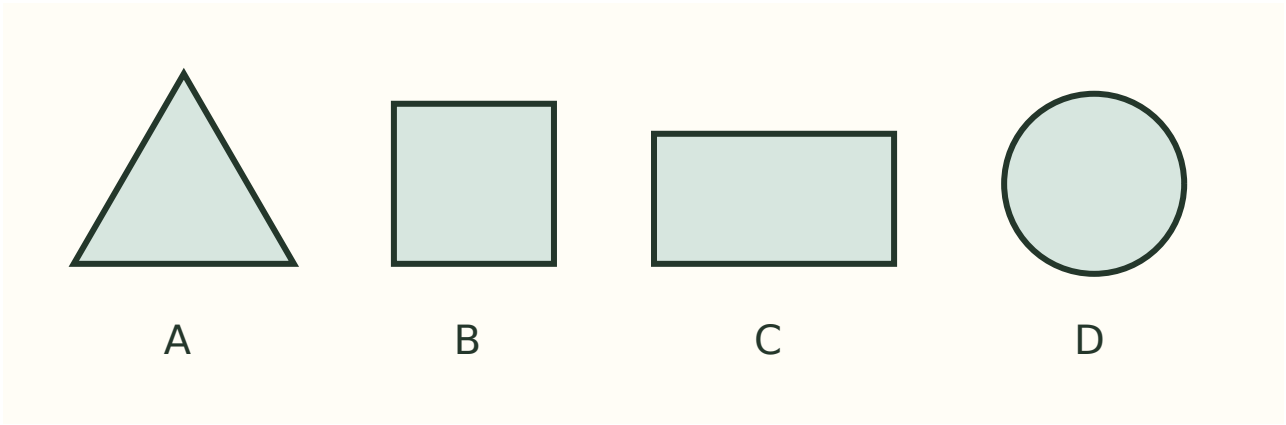

Answer: A circle.

2. A tiled floor uses four-equal-sided tiles with square corners. Name their shape.

Each tile has four equal sides and four square corners.

Answer: Squares.

3. A book cover is shaped like pictured C. Name the shape.

C has four square corners with two longer sides.

Answer: A rectangle.

4. Is a real ball a circle or a solid object?

It takes up space, although a flat drawing can look circular.

Answer: A solid object.

5. A triangular sign is turned sideways. Does its outline stop being a triangle?

Turning does not change the three sides and corners.

Answer: No.

6. Find a safe everyday object. Draw one face or its outline and name a matching flat shape.

Name the face or outline and explain using sides, corners or curves.

Answer: Answers vary: for example, draw a rectangular book cover or circular lid.
