Practice worksheet | Position and directions

Following and giving movement instructions

Name: _____ Date: _____

6 practice questions

1. Follow the pictured path. How many squares right does it move after going up?

2. Start at the bottom-left of a 3-by-3 grid. Move one square right. Where do you finish?

3. A counter moves two squares left and two squares right. Where does it finish compared with its start?

4. Write a route from bottom-left to top-right in a 3-by-3 grid, using only up and right.

5. An instruction says move three. What information is missing?

6. Draw a simple start and goal. Write two movement instructions, then check them with a finger.
