Collecting/sorting responses

6 practice questions

1. Use the card list. How many red cards are there?

Six colour cards, recorded once each.

Card	Colour
1	Blue
2	Red
3	Blue
4	Green
5	Red
6	Blue

Cards 2 and 5 are red.

Answer: 2.

2. Which cards belong in the green group?

Six colour cards, recorded once each.

Card	Colour
1	Blue
2	Red
3	Blue
4	Green
5	Red
6	Blue

It is the only green card in the list.

Answer: Card 4.

3. Each of four children gives one answer. Should the list have four responses or eight responses?

Each child gives one response.

Answer: Four responses.

4. After sorting 6 counters, a child counts only 5. What should the child do?

The total should not change when sorting.

Answer: Check for a missed or misplaced counter.

5. Sort these choices into groups: apple, pear, apple, banana, pear.

Count each of the five choices once.

Answer: Apple: 2; pear: 2; banana: 1.

6. Why should you record an answer as soon as it is given?

Careful recording preserves the actual responses.

Answer: It helps avoid forgetting an answer or counting it twice.
