Recording data in lists

6 practice questions

1. Read: apple, pear, apple. How many entries are recorded?

Count each entry in the list.

Answer: 3.

2. Read: bus, walk, car, walk. How many walk entries are there?

Walk appears second and fourth.

Answer: 2.

3. Use the six-card list. What colour is on line 4?

Six colour cards, recorded once each.

Card	Colour
1	Blue
2	Red
3	Blue
4	Green
5	Red
6	Blue

Read the fourth record.

Answer: Green.

4. Write a list for these three choices, using one choice per line: red, green, blue.

There should be exactly three records.

Answer: Red on one line, green on the next, blue on the third.

5. A list has two children choosing dog. Should one dog response be erased just because the words match?

They are two different responses in the same category.

Answer: No.

6. How can numbering the lines help you check a list?

Check there are no missed or repeated line numbers.

Answer: The last line number helps show the number of records, if each line has one record.
