One-to-one displays

6 practice questions

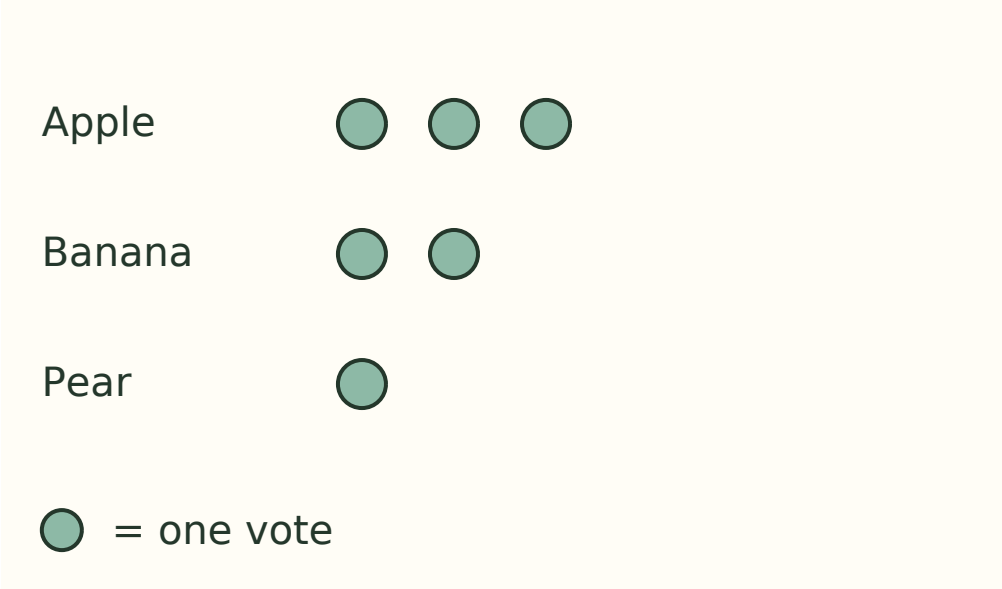

1. In the fruit display, how many dots are in the apple row?

Count the three symbols.

Answer: 3.

2. In the fruit display, how many votes did pear receive?

Its row has one dot.

Answer: 1 vote.

3. Draw a display for 2 red choices and 3 blue choices. Let one circle mean one choice.

Use equal symbols and keep the categories clear.

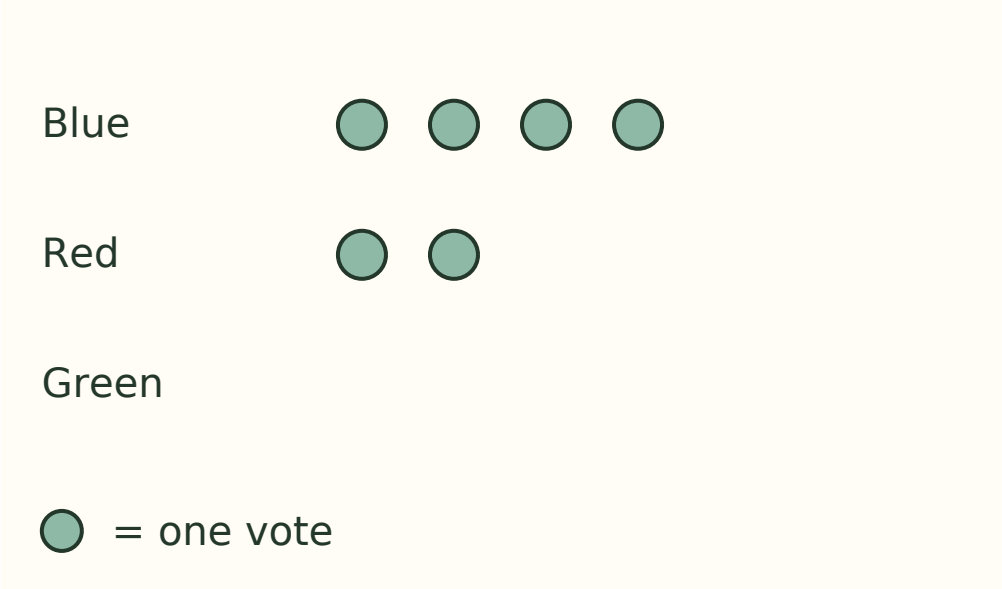

Answer: Two circles beside Red and three beside Blue, with a one-circle key.

4. A row shows five pictures. Each picture means one response. How many responses are shown?

Use the one-to-one key.

Answer: 5 responses.

5. In the colour display, what does the empty green row mean?

No symbol means no response in that category.

Answer: Nobody chose green: 0 votes.

6. Why should dots in different rows be the same size and equally spaced?

The drawing should not make fewer votes look like a longer row.

Answer: It makes the rows easy and fair to compare.
