Equal groups

6 practice questions

1. There are 3 plates with 2 apples on each. How many apples?

2 + 2 + 2 = 6.

Answer: 6 apples.

2. There are 4 cups with 3 pencils in each. How many pencils?

3 + 3 + 3 + 3 = 12.

Answer: 12 pencils.

3. One box has 4 blocks and another has 5. Are the groups equal?

4 and 5 are different amounts.

Answer: No.

4. Draw 2 equal groups with 5 dots in each. How many dots altogether?

5 + 5 = 10.

Answer: 10 dots, shown as two groups of five.

5. There are 6 children. Each needs 2 tickets. How many tickets are needed?

Count 2 six times: 2, 4, 6, 8, 10, 12.

Answer: 12 tickets.

6. Luca has 3 groups of 4 beads. Ava has 4 groups of 3 beads. Do they have the same total?

4 + 4 + 4 = 12 and 3 + 3 + 3 + 3 = 12.

Answer: Yes, both have 12 beads.
