Building and reading arrays

6 practice questions

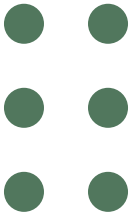

1. Count the dots in this array.

There are 2 rows of 4: 4 + 4 = 8.

Answer: 8 dots.

2. How many rows and columns are in this array?

Trace three horizontal rows and two vertical columns.

Answer: 3 rows and 2 columns.

3. Draw an array with 2 rows of 3 dots. How many dots?

3 + 3 = 6.

Answer: 6 dots.

4. There are 4 rows of 5 chairs. How many chairs?

5 + 5 + 5 + 5 = 20.

Answer: 20 chairs.

5. Arrange 12 counters in 2 equal rows. How many in each?

6 + 6 = 12.

Answer: 6 counters.

6. An array has 2 rows of 5. If you turn the page, it has 5 rows of 2. Has the total changed? Explain.

Turning the arrangement does not change the objects.

Answer: No. There are still 10 objects.
