Repeated addition

6 practice questions

1. Write repeated addition for 4 groups of 2.

Write one 2 for each of the four groups.

Answer: 2 + 2 + 2 + 2 = 8

2. Write repeated addition for 2 groups of 6.

There are two equal addends.

Answer: 6 + 6 = 12

3. Find 5 + 5 + 5 + 5.

Count 5, 10, 15, 20.

Answer: 20

4. How many equal groups are shown by 3 + 3 + 3?

There are three addends, each counting one group.

Answer: 3 groups.

5. A caterpillar has 3 body parts with 2 spots on each. Write an addition and total.

Count one group of two spots per body part.

Answer: 2 + 2 + 2 = 6 spots.

6. Is 4 + 4 + 2 an addition of three equal groups? Explain.

The addends must be equal to describe equal-sized groups.

Answer: No. The last group has 2 instead of 4.
