Limited money and saving

6 practice questions

1. You have 6 dollars. Does a 5-dollar purchase fit your budget?

$6 - 5 = 1$.

Answer: Yes; 1 dollar remains.

2. You have 10 dollars. Can you buy items costing 6 dollars and 5 dollars together?

$6 + 5 = 11$, which is greater than 10.

Answer: No. You need 1 dollar more.

3. A toy costs 15 dollars. You have 9 dollars. How much more must you save?

$15 - 9 = 6$.

Answer: 6 dollars.

4. You have saved 4 dollars. You save another 3 dollars. How much do you have?

$4 + 3 = 7$.

Answer: 7 dollars.

5. You need 8 more dollars and save 2 dollars each week. How many weeks are needed?

Count 2, 4, 6, 8.

Answer: 4 weeks.

6. You have 10 dollars for a 10-dollar book. If you buy a 2-dollar sticker first, can you still buy the book now? Explain.

Spending changes the money available for the goal.

Answer: No. You would have 8 dollars, so you would need 2 more.
