Numbers beyond 10,000

6 practice questions

1. Write 12,418 in words.

Read 12 thousands, then 418.

Answer: Twelve thousand four hundred and eighteen.

2. Write thirty-one thousand two hundred and five in digits.

31 thousands plus 205 gives 31,205.

Answer: 31,205

3. Write the number just before 10,000.

Subtract one from 10,000.

Answer: 9,999

4. Write the next three numbers: 15,998; 15,999; __; __; __.

Increase by one each time. Crossing 15,999 changes the thousands part.

Answer: 16,000; 16,001; 16,002

5. A town has 18 thousands, 3 hundreds, 2 tens and 6 ones in its population count. Write the population.

18,000 + 300 + 20 + 6 = 18,326.

Answer: 18,326 people

6. Mila writes twenty thousand and seven as 20,070. Explain the mistake and write the correct number.

20,000 + 7 = 20,007; 20,070 means twenty thousand and seventy.

Answer: The seven must be in the ones place. The number is 20,007.
