Practice worksheet | Money and problem solving

Class enterprise and others' wellbeing

Name: _____ Date: _____

6 practice questions

1. Six cards sell for 50 cents each. How much money is collected?

2. A class makes 10 cards costing 20 cents each. It sells only 6 for 50 cents each. How much remains after all materials costs?

3. After costs, a stall has 3 dollars. The class gives 1 dollar to a chosen project. How much is left?

4. Badges sell for 50 cents each. How many must sell to collect 4 dollars? This asks for sales money before costs.

5. The materials budget is 3 dollars. Card costs are 2 dollars 50 cents and labels cost 70 cents. A cheaper label set costs 40 cents. Which label set fits the budget?

6. A class has 2 dollars left after costs. Suggest a plan that considers other people and the next stall. Show that the plan uses no more than 2 dollars.
