6 practice questions

1. List the labelled objects with a curved surface.

2. Which labelled object has no flat faces?

3. A cube and rectangular box are grouped together. Suggest a shape rule that fits both.

4. A sphere and cylinder are grouped because they can roll. Is that a sensible rule? Explain.

5. Give a feature that separates a sphere from a cylinder.

6. Sort cube, cylinder and sphere into “only flat surfaces” and “has a curved surface”.
