Smaller/larger than a right angle

6 practice questions

1. Which pictured angle is a right angle?

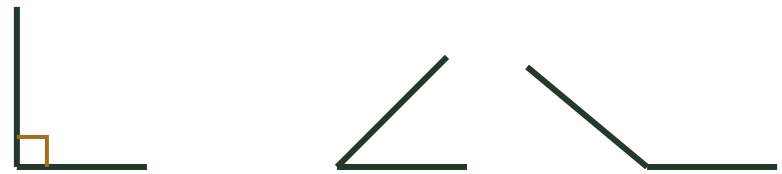

A B C

It has a square-corner mark.

Answer: A.

2. Which pictured angle is smaller than a right angle?

A B C

Its opening is narrower than A.

Answer: B.

3. Which pictured angle is larger than a right angle?

A B C

Its opening is wider than A.

Answer: C.

4. Name an object whose corner can help check a right angle.

Choose a corner known to be square.

Answer: Example: a rectangular book or sheet of paper.

5. One right angle has short arms; another has long arms. Is either angle larger? Explain.

Arm length does not change the angle.

Answer: No. They have the same square-corner opening.

6. Is a half-turn opening smaller or larger than a right-angle turn? Explain.

A half turn equals two quarter turns; a right-angle turn is one quarter.

Answer: Larger.
