Bird's-eye representations

6 practice questions

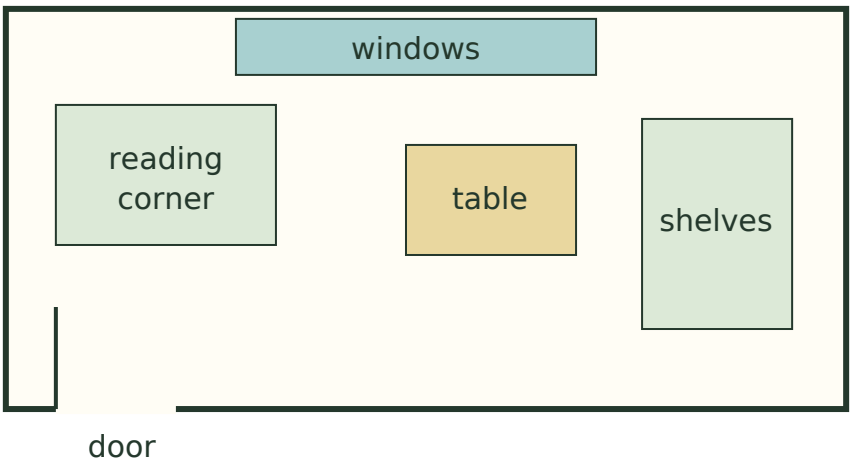

1. Which feature is along the top wall in the classroom plan?

Read the label at the top.

Answer: The windows.

2. Is the reading corner left or right of the table?

The reading corner is drawn on the table’s left.

Answer: Left.

3. What shape could represent the top of a rectangular desk?

Use its outline as seen from above.

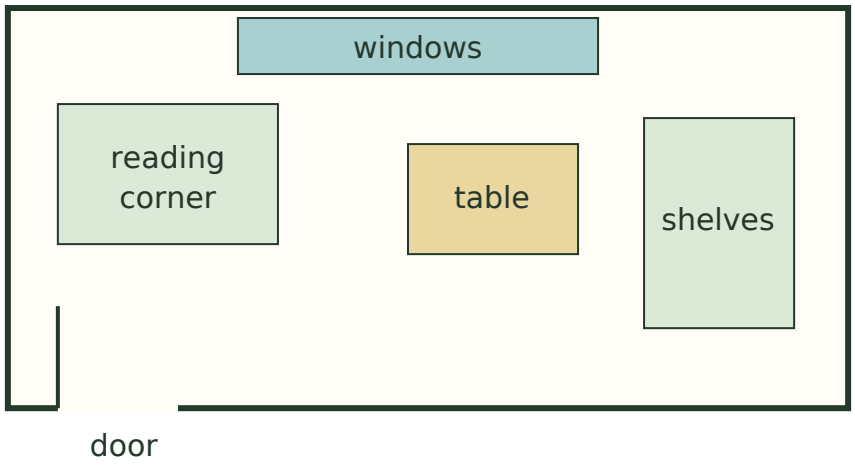

Answer: A rectangle.

4. A plan has no scale or measurements. Can it tell the exact room length? Explain.

The same drawing could be enlarged without changing its arrangement.

Answer: No. It shows arrangement, but exact length needs a scale or measurement.

5. Where is the door in the classroom plan?

Use the shared top-down viewpoint.

Answer: At the lower-left side.

6. Sketch a bird’s-eye plan of a round mat beside a rectangular table. Label both.

The circle represents the mat and the rectangle represents the tabletop.

Either side is acceptable if the objects are beside each other.

Answer: A labelled circle beside a labelled rectangle.
