Letter-number references

6 questions | 7 marks

Equivalent correct methods earn the corresponding marks.

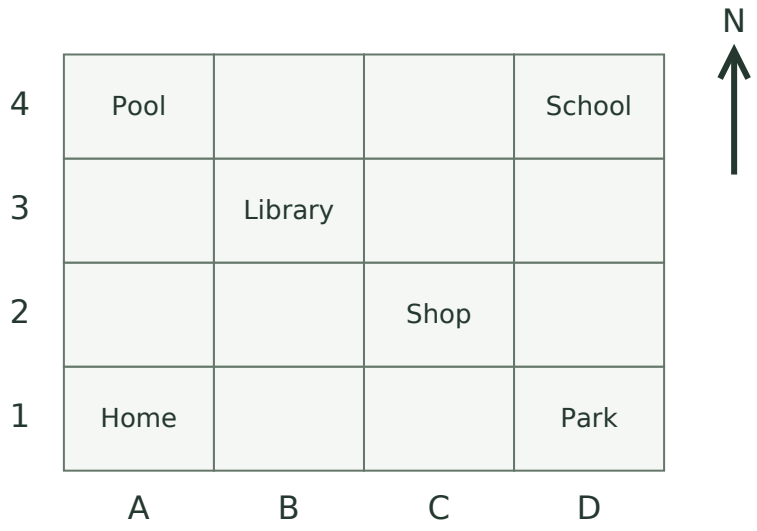

1. Write the grid reference of Home. [1 mark]

Home is in column A, row 1.

Answer: A1.

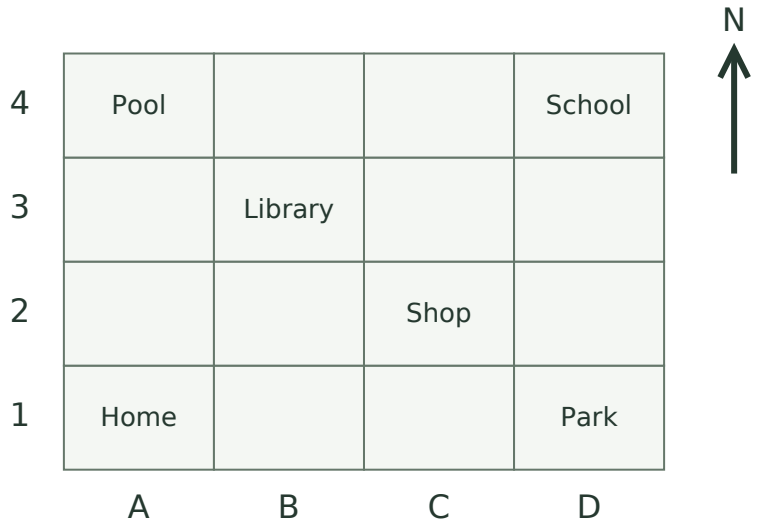

2. Write the grid reference of School. [1 mark]

School is in column D, row 4.

Answer: D4.

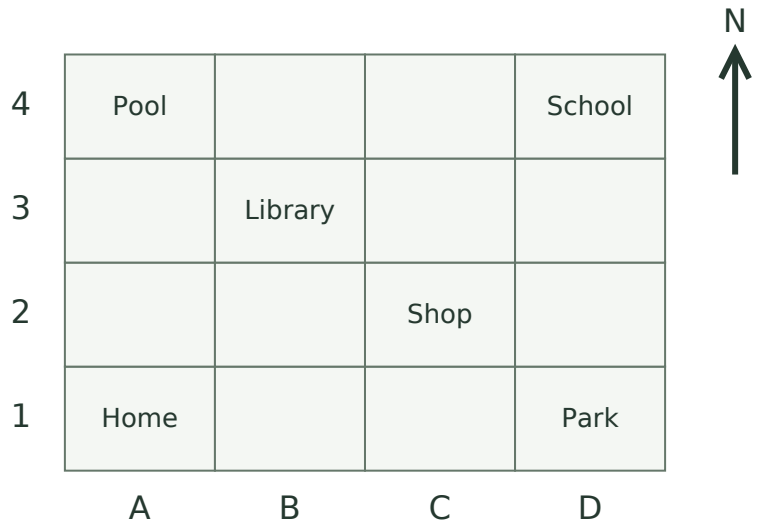

3. Name the place in A4. [1 mark]

Column A and row 4 meet at the pool cell.

Answer: Pool.

4. Name the place in B3. [1 mark]

Column B and row 3 meet at the library cell.

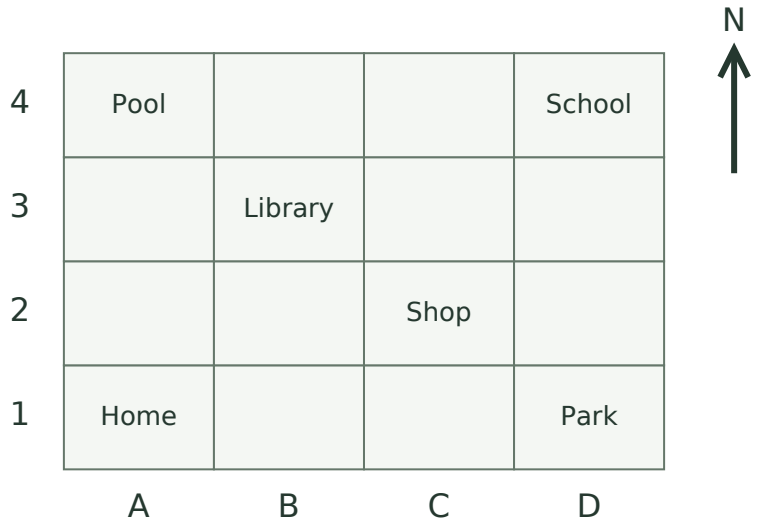

Answer: Library.

5. Which reference follows this map's rule: 2 C or C2? [1 mark]

The column letter comes before the row number.

Answer: C2.

6. Explain why D4 identifies a cell rather than one exact point inside the school.
[2 marks]

Grid-cell references are different from point coordinates.

Answer: The reference names the entire column-D, row-4 box. It does not describe a point within it.
