Locating positions on a grid

6 questions | 7 marks

Equivalent correct methods earn the corresponding marks.

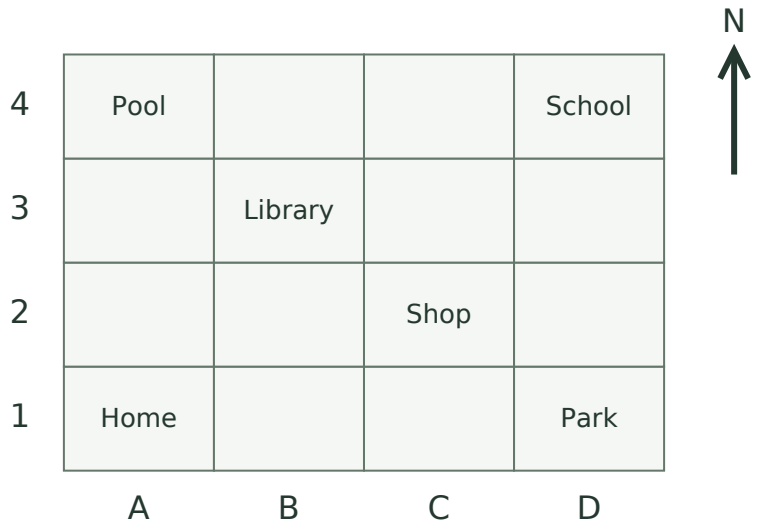

1. Which named places share row 1? [1 mark]

Their references are A1 and D1.

Answer: Home and Park.

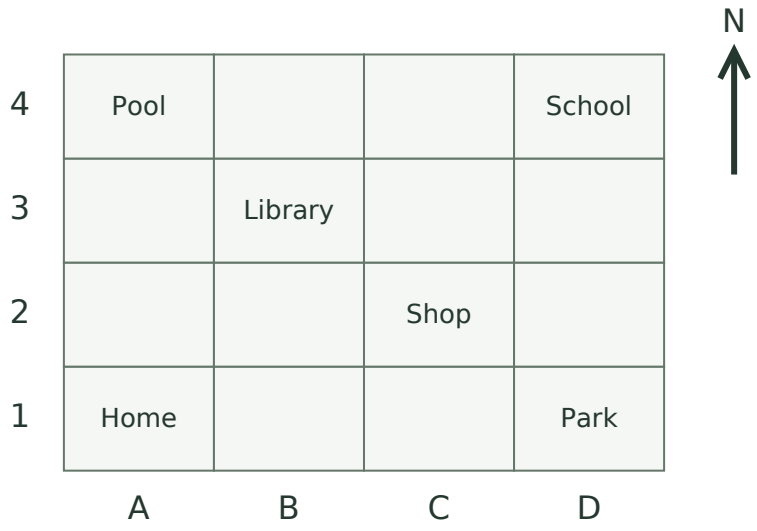

2. Which named places share column D? [1 mark]

Their references are D1 and D4.

Answer: Park and School.

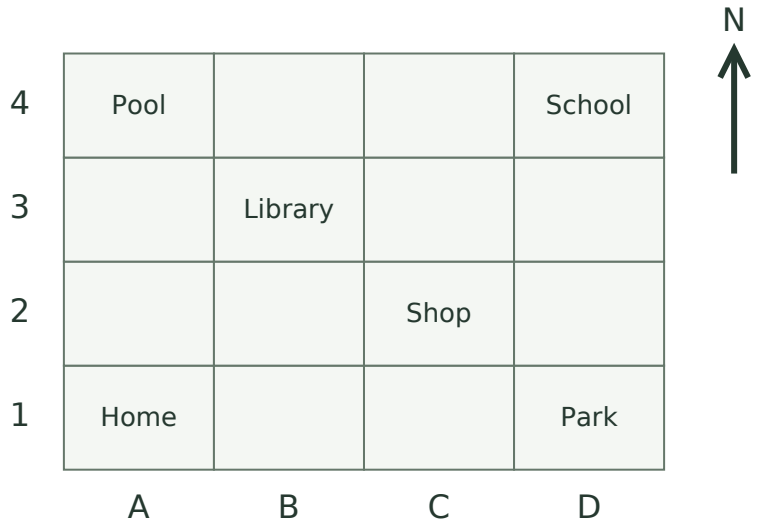

3. Is the library above or below the shop on the map? [1 mark]

Library is in row 3; Shop is in row 2.

Answer: Above.

4. How many column steps separate Pool in A4 from School in D4? [1 mark]

A to B, B to C, then C to D.

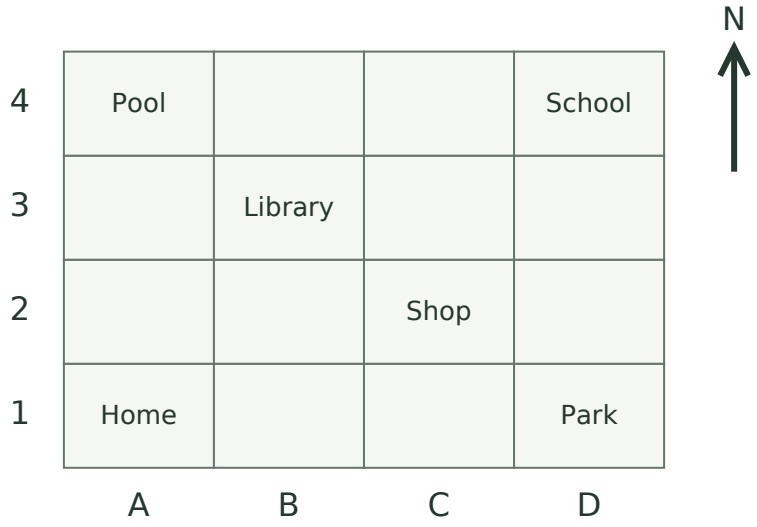

Answer: Three.

5. A marker is one row above C2 and stays in column C. Give its new reference. [1 mark]

Increase the row number by one but keep the column.

Answer: C3.

6. Give two different clues that identify Home on the map. [2 marks]

Other correct combinations of unambiguous clues are valid.

Answer: For example: it is in A1; it shares a column with Pool and a row with Park.
