Practice worksheet | Algebraic expressions and formulas

Variables, constants and terms

Name: _____ Date: _____

6 questions | 9 marks

1. Name the variable in $4x + 7$. [1 mark]

2. What is the coefficient of m in $9m + 2$? [1 mark]

3. What is the constant term in $3a + 12$? [1 mark]

4. List the terms in $6p - 4q + 10$. [2 marks]

5. A delivery costs $5b + 8$ dollars, where b is the number of boxes. What does 8 represent? [2 marks]

6. How many terms are in $2r + 3s + 4$? Name its variables. [2 marks]
